TAKE YOUR INVENTORY TO NEW HEIGHTS

Outdated manual inventory management can be stressful, inaccurate, and time consuming. A new class of inventory management platform awaits with Stratosphere. This easy-to-use, yet powerful web application delivers real-time inventory data from your Terso devices anywhere in the world, so you can **Know Now**.

WHAT YOU'LL EXPERIENCE...

Visibility

- Track inventory from Terso devices anywhere in the world
- See inventory movement in real-time
- Review an item's complete journey to point-of-use

Integrity

- See real-time temperature reporting from Terso devices
- Track and be alerted to expiring and expired product
- Package integrity documentation feature available

Security

- Control website and device access for each user
- Audit every user action for compliance and regulatory peace of mind
- Count on the latest web security standards and best practices

Ease of Use

- Contextual In-app documentation and live support
- Responsive mobile-friendly design
- Cloud-hosted convenience, reliability, and scale
